

## EMPLOYMENT OPPORTUNITIES

# Senior Consultant (C2) Positions:

## Summary of Responsibilities

You conduct analytical and performance procedures for an organization under a Manager or Director's supervision, on innovation, procurement, supply chain or operations.

You participate in demonstrating ideas with your client in order to identify and assess concrete and ambitious pathways towards improvement.

You endeavor to implement the recommendations directly related to your client's operational teams.

Depending on the case you will be able to supervise one or several junior consultants when undertaking certain analyses. You will also be able to actively take part in certain aspects of piloting the project, to support your manager.

You are in charge of consolidating and summarizing the operations and progress made with management and for presenting them to the Steering Committee and/or the Executive Committee.

## Profile

You have a Bachelor's Degree from an engineering or business school, 3 to 5 years of operational experience in consulting or in similar fields.

You enjoy working as a team and are able to adapt quickly in order to evolve in various different environments with professionals from other cultures and with different experience.

You are a rigorous and conscientious worker with advanced analytical skills. You have the ability to develop excellent relationships with clients and have an entrepreneurial spirit.

You are proficient in Microsoft Office.

You speak fluent English. Additional language fluency is preferred.
